

SUREContainer™

A New, Ergonomic Alternative to Wood, Bulk, and Gaylord Containers

SUREContainer™ is an innovative packaging and storage solution that provides a more ergonomic and safer

way for workers to efficiently load contents within a large container. The innovative design allows for one or more sides to be removed so items can be placed within the container from the side versus lifted over the top. Placement of items is more controlled and efficient.

In addition, SUREContainer™ can be built around your product to provide protection from damage during shipment, handling and storage. It is ideal for items that are irregularly-shaped or heavy-to-load in a traditional wood or bulk container. Our packaging engineers design the dimensions and thickness of the container walls according to the specific application. When it is time to ship your product, simply assemble the 4 walls of SUREContainer™ around your product.

Product Options

Custom Sizes

- Can be built around the size of your item(s).

Standard Dimensions

- 40 x 48 x 35" and 30 x 30 x 27 with a medium caliper (.160) and heavy caliper (.225).

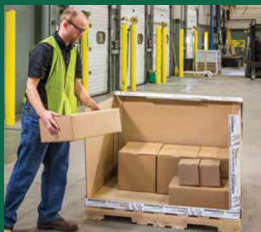

Other Benefits

Reusable

- Depending on the application, SUREContainer can be reused multiple times.

100% Recyclable

- Laminated paperboard and corrugate materials.

Easily load and unload with SUREContainer

SUREContainer can be built around your product

SUREContainer fully assembled

A custom engineered solution, SUREContainer™ is ideal for items that are hard to load in a standard, bulk, or Gaylord container. The container can be built around your product(s). Our engineers can assist you with creating the perfect SUREContainer™ for your products and application.

Course of Action	SUREContainer™ System	Wood Crates
Crate Strength and Consistency	Uniformly made to eliminate inconsistencies often seen in wood. Laminations® paperboard equals or exceeds the stacking strength of wood, even in damp and humid environments.	Manufactured with irregularities such as knots, grain patterns, and cracks, which can decrease strength.
Material Cost	Paperboard is less expensive than wood.	Can be costly and difficult to store; additional space may be needed.
Assembly Time	Easy and quick to assemble. SUREContainer is preassembled as a kit and arrives ready-for-use.	Can require two or more people to construct. Assembly also often includes sawing.
International Shipping	Paperboard requires no ISMP-15 or "bug stamp" certification.	Must be made from ISPM-15 certified wood.
Safety	No rough edges, splinters, or splits from hardware.	Splinters, rough edges, and splits are inherent to wood. Can also incur additional risks from sawing.
Disposal	100% recyclable and less material to break down.	Can be difficult and costly to dispose.
Custom Print Options	Add a professional-looking logo, tagline, or print code.	Can be cumbersome to print.
Lightweight	Cost effective when shipping products LTL.	The weight of wood may incur higher shipping charges.

To learn more about a SUREContainer™ solution for your business, visit laminationsonline.com or contact us at 800-925-2626.

Our Sales and Engineering team will assess your needs and design a solution that takes into account the product being shipped, the distribution environment, and any special circumstances.
