

SURECrate™

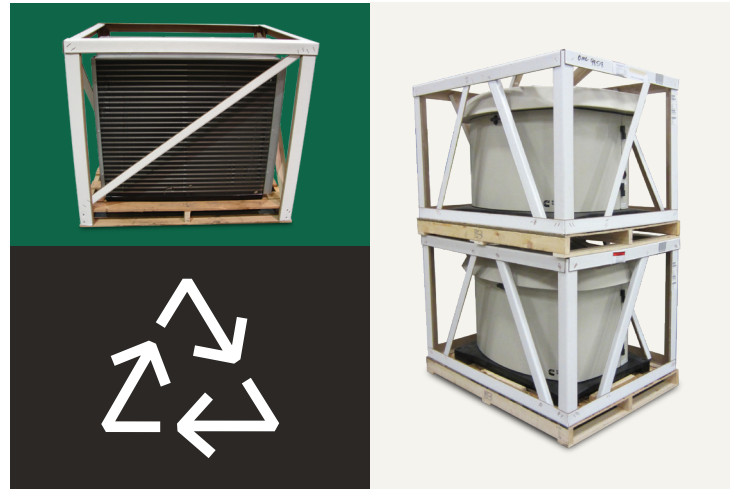

A New Alternative to Wood or Steel Crates

The SURECrate™ Custom Engineered Solution is a comprehensive, turnkey alternative that offers a lower total cost solution to packaging and shipping large or irregular-shaped products. It's ideal for any heavy or hard-to-box items and is a superior choice to wood crating. Handling, shipping and disposal is easy and cost efficient, creating a better customer experience throughout your entire supply chain.

Made from the same 100% recycled laminated paperboard materials as all Laminations® products, each SURECrate is a complete engineered system that is customized to the precise needs of each situation.

The SURECrate custom engineered solution is perfect for protecting large, heavy and hard-to-box product, whether it's being shipped across town or across the world. SURECrate is idea for:

- Recreational vehicles
- Motorcycles
- Lawn tractors
- Generators
- Machine components

	SURECrate™ System	Wood Crates
Crate Strength	Laminations® paperboard equals or exceeds the stacking strength of wood, even in damp and humid environments	
Material Cost	Paperboard is less expensive than wood	Can be costly and difficult to store; additional space may be needed
Assembly Time	Easy and quick to assemble. All pieces come precut and ready for assembly	Can require two or more people to construct. Assembly also often includes sawing
International Shipping	Paperboard requires no ISMP-15 or "bug stamp" certification	Must be made from ISPM-15 certified wood
Safety	No rough edges, splinters, or splits from hardware	Splinters, rough edges, and splits are inherent to wood. Can also incur additional risks from sawing
Disposal	100% recyclable and less material to break down	Can be difficult and costly to dispose
Custom Print Options	Add a professional-looking logo, tagline, or print code	
Lightweight	Cost effective when shipping products LTL
